Today's Lesson On Results And Success

This video addresses results and success in your business and your life.

Part of success is looking at your results to see what you have accomplished. The bigger part of success is first visualizing what you want your results to be. If you don't visualize it then it won't happen.

Today, we are able to communicate in seconds across the world, fly wherever we want because someone had a vision that these things could be a reality.

To achieve the results and success you desire you must not only have a vision. You must continually challenge yourself to expand your vision.

1. What is your vision of your future a year from now?

2. What is your vision of your future three years from now? This expands your vision a little more.

3. What is your vision of the future five years to ten years from now?

When you are in school there is a structure and logical progression in place to expand your vision. The challenge, once you are on your own, it to set up your own structure and logical progression.

1. What will you need to do to make your vision of your future one year from now a reality?

2. What will you need to do to make your vision of your future three years from now a reality?

3. What will you need to do to make your vision of your future five to ten years from now a reality?

Only when you create your vision and put the pieces in place to realize it can life teach you the lessons that you will need to grow your business and to have personal development.

When you have a vision and create your structure you will make measurable progress in a reasonable amount of time. That measurable progress will be the results and success you desire.

Go out and get the vision. Create your path to success. I know that is a result you will like.

Remember, the formula for success works. The only question is whether or not you will follow the formula.
